MATRIMONIAL. General Agent for the United States

TO THE LABOUR OF THE UNITED STATES It has been my good fortune to restore to health many

My success has excited the mainted of the service and mainten but their persocutions have served only to extend and establish my repetation. Showers of grateful offerings have fallen upon my satisfacy, from the fair sufferent a bond. I have reflered. So long as I can beld in affertionate and thankful remembrance by those who have experienced my

kill, I can afford to despite the efforts of muchisf-maker cine for producing monstruction within the reach of the Ladies of the United Street, but an adisposition to enter a field as accepted by quarker, with their permittons nostrana-and a fifte that unpransipled counter(citers might pain upon the public their worthless instations, have hither o pre-

vented me from establishing agencies for the sale of my "AMIE DE FEMME," in the United States. At last, I yield to the entrenties of patients and fraeeds and offer to the suffering Females of America a medicine which has rendered me atmosphat famous throughout the

Old worse.

In regard to the efficacy of the "AMIE DE FEMME," I need only say, that it is in liquid form, and is exactly such as I have used in my gravitics in France, for many years, and that it has never fulled to secure a satisfactory result. The "Ainse de Femme" and menstruction stand in the re-lation of cause and effect. It is alike powerful to originate a healthy menstrual flow where it never has existed, and to

restore it where it has been from any cutto suppressed, In order to guard against imposition, the wrapper of directions on each tectic of the "A six de Fomme" will bear my written agantater, and such the brottle and enclosing lox will be scaled with my private real.

PARIS, January, 1857. Da. P. H. RICORD.

BO Superior Street. The great length of time which the instrument remains in turn

ments, and have the reader to draw his own conclusions.

1, The Hallet, Denvie & Co. Piamos have a greater length of string than thoise of any other make in the same sured case.

The truth of this stainment may be seen at a glance, as nearly the cuttire length of a straight atting can be used for vibration, (see diagram) while those that are best, uccessarily have the rest or bridge just inserted at a great distance from the and of the piamo; else the angle smalled be so great the string would amp in twain before it could be drawn up within an octave of concert pilet.

2, The Hallet, Davis & Co. Pianos have a wider ce between the strings than those of any other

4. The exempess of the vibration of the string. However, good a string may be, it will produce no home until it vibrates, and the evasiver the vibration the heriter the tone, at to vibrate evaly, the string should have but two distinct a tions, directly to and fro. The hammer excluse on the said side, (see diagram H.) and the first motion of the string is to recede from the hammer. In the H. D. & Co. plann the second maxim of its string is to recede from the hammer. In the H. D. & Co. plann the second maxim of its string is to return in a straight direct line to its starting point, and then, if it vibrates a thousand times, its motion is no, down—as forward of orders—as forgistin.

Furniture Polish-making old Furniture look as good as new, (and the only kind that can wit ety be applied to Pianos) only 50 cents spices.

A full and splendid assortment of SHEET MUSIC and MUSIC if OKS constantly on hand.

S. N. SANFORD, A. M., Principal. ion is about to enter upon its FIFTH YEAR, with a reputation rarely secured in twice or thrice as it is in a very retired portion of the Beautival Forcet City, with Expensive and Beautifully Shi

EXPERIENCED AND SUCCESSFUL INSTRUCTORS. It affords advantages not surpassed, if equalled in any Institution in the Country. If combines all the advantages of the City and County, with few of the disadvantages of extent. The Principal and he Lady will give their best attention to the Physicsi. Intellectual and Moral wants of those contributed to their care. Extended courses of Lactures upon each of the leading branches of Natural Science will be invited by the Principal, activited during a piction of the Terminal Science of the Principal activities of the College Principal and Surgeons. New York City.
